

Q3 - What did you like about this program?

teachers and most class room knowledge gained

I like that there are multiple chances, if necessary, to receive a perfect score on each assignment. I also like the instructors willingness to help at all times.

I really enjoyed the simulation because I felt like I was learning something after each quarter. The feedback was beneficial. I also really REALLY, liked the flexibility in turning assignments in. The hard due dates each week is many times my downfall in other classes but XXXXX flexibility with the due dates (of course hard due date at end of semester), was very beneficial to my very hectic busy schedule.

I liked the hands on experience and opportunities we had to meet employers.

I liked the learning experiences. I can use what I learned in the real world and it helps me get an understanding of what to expect in my future career.

Mix of many varieties of classes.

I liked having the option for many classes to take traditional, blended, or online. Several semesters I took several different options

I like that the instructor is laid back and wants us to succeed.

Classes were flexible, good instructors

I liked the classes flexibility options.

Working in groups and doing simulations to see real life situations.

Service learning project last term.

Q4 - What would you change about this program?

less career events/job-fairs/trade-shows etc, more emphasis on business plan

I do not like having to attend so many events. Many didn't pertain to me at all.

I think going through what is going to be expected each week in the first class and really emphasizing how much is going to be expected. Allowing or having everyone create their group and start the business plan right away actually might be beneficial too. It would look like a lot but would be helpful. I did not like not having class each week. Being in class gives me time to do homework and talk to the teacher.

Less research projects. I knew the majority of answers without research. To find other people's insight was so incredibly time consuming.

I would like the teachers to explain more and get more in depth.

Nothing, I thought all the classes were beneficial for my whole time here.

Only offering some classes in spring/fall, if they were offered for both (other than online only) I could have completed degree sooner

I do not like the multiple events we have to attend.

nothing

I felt like the workload became overwhelming at the final semester, I found this to be unexpected and really make me feel uneasy about my time commitments.

more group projects to learn from one another.

no so many simulations or online books.

Q31 - CONCLUSION Please use this space to share any other feedback, comments, or suggestions about your experience at Western Technical College.

I wish i would have known about DECA and other groups to join, i lived in town and mostly took online classes due to its flexibility but would've enjoyed being a part of organizations within the school.

Nothing.

It was a great experience. Classes were normally flexible, as in there was multiple times and days for classes. Easy to schedule around other responsibilities. Blackboard was easy and simple to use. Instructors were great with responding to questions that arose.

I think it is a great program. I thought accounting was very beneficial and I think it is the wrong choice to remove it from required curriculum.

Enthusiastic professors that made experience fun.

Western Technical College is awesome!
