

Western Student Learning Results (Program Outcomes) for 2011

Source: Student

of Grads: 48

of Responses: 39

Program: Accounting

Outcome	Yes	No	Unk	NA	Result	Feedback
What did you like about this program?	39 100.00%	0	0	0		
	Yes					I liked the practical knowledge and hands-on experience it gave me. I used a lot of what I learned when I entered my first accounting job.
	Yes					I liked how the program was hands on. We had to complete the books for a business. It really helps learning inside the classroom and then also applying it to projects.
	Yes					Cost accounting was kind of hard to understand. Maybe better explanations and examples to help understand more. Teachings was a little fast pace.
	Yes					What I liked about the accounting program was how flexible classes and advisors were. The "you can do it" attitude is what kept me going.
	Yes					I liked that this program used a hands-on approach to teaching the accounting basics. I liked that we were able to have real life situations demonstrated for us.
	Yes					I liked the teachers, everyone was very helpful when I had a problem.
	Yes					I really liked that they did projects, such as Meat R Cheese, Amman Audio, etc. so that we could really put to use what we're learned in the classroom.
	Yes					I liked that it was very hands on. I believe with all the practice problems I have gained a better understanding of accounting.
	Yes					I like the program because it was challenging and the teachers were a great resource to us. they encouraged us and made us strive for perfection.
	Yes					The projects gave me a better understanding of how things will be done on a real job. If it wasn't for all the hands on, I think I would be more scared upon entering a job.
	Yes					I liked what I learned and how I was taught for the most part
	Yes					The number one thing I liked about the Accounting program was the ability to take every class either online or at an extended campus. Another thing that I like almost as much was the fact that you were able to take a lot of the classes when you wanted to, rather than have a concise path you had to take to the end.
	Yes					I thought the teachers were very knowledgeable / experts in their field. They did a good job and did everything they could to help you succeed. The text books were good, too. I did not like lugging that thick/heavy accounting book around. They should divide it into two books.
	Yes					I liked that I had my teachers available to me when needed.
	Yes					I enjoyed the instructors and my fellow students. I attended school here in 1993. This time my experience was much more positive. I'm not sure if the school improve or if age made me feel that way.

<i>Outcome</i>	<i>Yes</i>	<i>No</i>	<i>Unk</i>	<i>NA</i>	<i>Result</i>	<i>Feedback</i>
					Yes	Enjoyed the variety of classes that I needed to take in accounting, for example, payroll, cost, and tax. Thought the accounting spreadsheet class was the most helpful and something I will use in work and in my personal life.
					Yes	It was a very good program I learned many things from this Accounting program, and feel I will be very successful with my Degree.
					Yes	My favorite thing about this program was Jenny Parker. She is an excellent teacher and without her I am not sure that I would be graduating.
					Yes	Most of the instructors were very wise in the subjects they were teaching. However, I was upset about Bruce Bachtell leaving midsemester and being replaced by Paul Mack. He gave my group in Cost II the run around, told us one thing then changed his mind, and he was never prompt in communication.
					Yes	It gave me a better understanding of what all goes into a business to try and make a profit.
					Yes	All the teachers were willing to help if I had questions about anything.
					Yes	The program had it's challenges with the many projects required, but those challenges aided in learning the material & offered a sense of achievement after completing each project.
					Yes	I really enjoyed the program and learned a lot.
					Yes	The essentials were taught great starting from basics to more difficult goals. I mostly liked the real life exercises. The packets that were set up and the cost 2 business was a great learning experience.
					Yes	While I did enjoy my tenure at Western, I was a little surprised by the inconsistency of the education I received. Three of my classes were taught by two different instructors due to the initial instructor leaving for personal/health reasons.
					Yes	That I was able to complete at an Out Reach Campus. I got to know my classmates well since classes were small. Nice instructors.
					Yes	Very straight forward and taught things that would pertain to working in accounting - did not have to take a lot of "theory" type classes.
					Yes	I liked just about everything about the program. I however, did not care for a particular teacher. I loved using aplusia. I thought this was an amazing teaching tool. Jenny Parker was the most amazing teacher that I have ever had. I wished I had her for everything!
					Yes	Being able to take classes in the evening
					Yes	overall, the program was good.
					Yes	I liked the variety of learning. Some teachers gave assignments that were hands on and others taught by visual means. Both were very effective.
What would you change about this program?	38	97.44%	1	2.56%	0	0
					Yes	I would change the Cost Accounting 2 project.
					Yes	Nothing
					Yes	I would change how the Cost Accounting II project is written and organized so it is easier for the students to follow and use.
					Yes	The only class I didn't feel I had a lot of use for was Information Systems. The information was important, but a lot of it was repetitive.

Outcome	Yes	No	Unk	NA	Result	Feedback
	Yes					I would maybe break the Cost 2 project into two semesters. I know that Cost 1 is to learn about cost accounting, but the Cost 2 class is so time consuming it literally takes up all your spare time.
	Yes					Restructure the capstone Cost Accounting II project to function more like Meat 'R Cheese or Amman Audio. Nearly every student in my class would unanimously agree with that sentiment.
	Yes					If you had asked me this question when I had first enrolled in the Accounting Program, I would have told you I didn't feel the need to learn psychology or sociology or even ethics. However, now that I have completed those courses, I have changed my mind. I found every class required to be necessary building block in my educational foundation. I enjoyed myself and was surprised at how important those traits and skills really are in the accounting field. I'm not sure I can say I would change anything about the program.
	Yes					I don't think I'd really change anything about the program. I learned alot of the course of my two years in the accounting program.
	Yes					I would make cost II worth more credits. The project we do in that class is long and complicated. It is certainly worth more than 2 credits.
	Yes					I wouldn't change anything. I think it's a great program! I learned so much and it prepared me well for the real world.
	Yes					the only thing i would change would be cost 2. this class incorporates more than cost components. it should be an overall accounting course and considered more credits.
	Yes					Information system and case analysis both seemed like a waste of time.
	Yes					I would have liked it if I would have had the same advisor through out my degree process.
	Yes					I would eliminate Cost Accounting II or change the ciriculum of the course. 14 weeks on one project with little to no guidance was ridiculous, as was the amount of time necessary to put into it for a mere 2 credits.
	Yes					The requirement for so many of the general classes that seem to teach some of the same principles.
	Yes					Cost II was A LOT of work...more than I have put into any 4 credit course. I would definitely make the class worth more credits. Other than that, the program was good and had good time slots for those of us who work full time during the day.
	Yes					The Information Systems Accounting class should be taught as a blended class. It's alot easier to do discussion and better understood.
	Yes					Some of the faculty made assignments had many problems and made it difficult to learn from. Also, I dont like generals.
	Yes					I really enjoyed this program and believe that I have learned a lot from it. I believe that one thing that might be beneficial is not having two classes in a row so you are stuck in a room for 5 hours because after you get done with the first class you are exhausted and sometimes it is hard to switch gears and consenstrate on the tasks at hand.
	Yes					Wouldn't change anything, I like having practice sets to demonstrate we know what we're doing and see how it actually fits with real work situations

<i>Outcome</i>	<i>Yes</i>	<i>No</i>	<i>Unk</i>	<i>NA</i>	<i>Result</i>	<i>Feedback</i>
					Yes	I would increase the credit value of the Cost II class. That class took more effort and time than any of my 3 credit classes.
					Yes	I would change the cost accounting II class to three or four credits. I also get change the accounting orientation class. We do not have to make a binder anymore. But I feel some of the assignments are good learning assignments. The class does need to be altered though. I would maybe recommend using the required assignments (such as the job shadow) in the professional development class.
					Yes	Nothing. It's too bad they are discontinuing VITA. I thought that was an excellent followup to income tax class.
					Yes	Nothing
					Yes	Some of the changes I would have suggested at the beginning of my education (for example, getting rid of the accounting student portfolio requirement) were made during my time here, without my suggesting them. The college seems to be on the right track. Keep up the good work!
					Yes	I enjoyed my experience with the whole program. If I would change one thing it would be to make sure that students from the extended campuses get the acknowledgements they should. I feel that the students at the La Crosse campus get acknowledged for their achievements more than do the students from extended campuses.
					Yes	Some of the work was unnecessarily time consuming. Otherwise, it was great.
					Yes	I don't think I would change anything. I really enjoyed the program and thought everything went well.
					Yes	I don't think there would be anything that I would change about the program.
					Yes	Continue not to have to turn in a portfolio for Accountancy.
					Yes	The only thing I would change would be the credits for certain classes. For example, payroll accounting and cost accounting 2, had very challenging and time consuming projects, which seemed to exceed the credits given for the classes.
					Yes	There is nothing that I would change about the program.
					Yes	I would delete the orientation class that was required and change the Cost II class to at least 3 if not 4 credits. It was a lot of work for only 2 credits.
					Yes	I think a marketing class may have helped.

Use effective communication skills. **38** 97.44% **1** 2.56% **0** **0**

Yes	It was very clear that one needs to be an effective communicator to understand what is expected of them.
Yes	I would recommend the teachers to advise the students on how e-mails should be handled. They need to make sure to tell them to use the class name in the subject box.
Yes	Yes, I feel that the communication was pretty good. When I email them I get a response less than 24 hours.
Yes	Western's accounting program, as well as the necessary generals, definitely aided me to advance my communication skills.
Yes	I would concede that the program provides sufficient courses to help students communicate effectively.
Yes	Yes

Outcome	Yes	No	Unk	NA	Result	Feedback
					Yes	I believe that it has shown us how to effectively communicate in our field.
					Yes	Taking online courses you have the discussion boards to help communicate with other students. These are required and gives you the written communication skills that will be important on a job. In class we communicated with other students on projects and help me learn how to communicate better. This you need to get your message across.
					Yes	Really helped me brush up on my writing skills.
					Yes	I never felt as if I were alone...there was never a communication issue between myself, the instructor, or any of the classmates. Instructors were informative and each taught their class with enthusiasm, knowledge and professionalism.
					Yes	The whole program was very beneficial. I feel that it has met my needs and am prepared to proceed into the workforce with confidence.
					Yes	I think I've learned a lot about effective communication skills and the presentations have helped me overcome a little of my fears of public speaking.
					Yes	Western has prepared me with effective communication skills
					Yes	I believe that the classes in the Accounting program more than helped me to communicate more effectively.
					Yes	In feel that I am prepared to enter the workforce.
					Yes	yes, everybody did great.
					Yes	We learned plenty on how to communicate in a business style. We practiced business presentations as well as how to communicate with employers during interviews and with resumes.
					Yes	This program has helped me to communicate in a more businesslike and professional way.
					Yes	Writing assignments were sometimes program specific which was helpful.
					No	still lacking in this area, but the school did what they could
Apply mathematical concepts.	38	97.44%	1	2.56%	0	0
					Yes	There is a lot of math in accounting...that is why I like it!
					Yes	I feel I have a good understanding of the mathematical concepts that I have learned.
					Yes	I didn't apply everything I learned in business math to the accounting courses, but I am content with the skills I learned.
					Yes	The mathematical concepts, such as formulas, were my favorite parts of the accounting program!
					Yes	We do use mathematical concepts almost on a daily basis.
					Yes	The classes I had helped some with a better understanding of math concepts. Otherwise a lot of it was sort of review.
					Yes	Even though it is accounting and math skills are necessary, I really still believe that there is relatively minimal amounts of math used in accounting.
					Yes	I found mathematical skills very helpful in this program.
					Yes	We used plenty of math in accounting. The skills we needed were taught well.

Outcome	Yes	No	Unk	NA	Result	Feedback
					Yes	I love math, and I always have. I felt it only natural to enroll in the accounting program. I liked learning new mathematical concepts, and because of the accounting program I am able to apply what I have learned in my professional career.
					Yes	Yes, Projects are very helpful to me and alot more exciting then homework.
					Yes	The accounting courses and Math w/ Business Applications provide sufficient mathematical understanding.
					Yes	I learned a lot about applying mathematical concepts.
					Yes	Business math was the hardest class when it came to math skills and concepts. What was needed for the accounting classes was minimum and not hard at all.
					Yes	It was nice to have the business math course to refresh our memories on all the math information that we would need to complete the course.
					Yes	With all my accounting classes, I have definitely learned many different mathematical concepts that will be very usefull on any job.
Transfer social and natural science theories into practical applications.	38	97.44%	1	2.56%	0	0
					Yes	I found the social theories made it easy for one to communicate with others in the class and realize that not everyone thinks alike.
					Yes	I don't believe that this is something that has been extremely enforced but then again I did not have to take all my general courses at this college either.
					Yes	You have to keep an open mind when you may be in a disagreement with someone. Just because you think that your way is the right way doesn't mean that someone elses way isn't right also. This will help to see the different points of view even if we do not agree.
					Yes	I can't think of anything that natural sciences were applied to in the accounting program. However, the social aspect could be applied in the cost accounting to 2 project.
					Yes	I'm not exactly sure how this is related to accounting.
					Yes	Ethics and Sociology played an enormous role in how my attitude has changed regarding the people I encounter in my life each new day. We are not all created equally, and I have learned to appreciate everyone for their own unique qualities. We all have a purpose and what we do with it is what separates us from one another. Some wish to achieve great things in life and others are content right where they are. I look at life differently, because of what I have learned at Western Technical College.
					Yes	Yes some theories, but some did not seem relevant or necessary to learn about.
					Yes	Most skills were taught to be used in real life situations.
					Yes	As I said before, the emphasis on practicality is one of the things I liked most about this program, and one of the things that stood me in good stead on the job market.
					Yes	I think the psychology, ethics, and socially classes are useful and practical to improve the quality of everyday life.
					No	I have not mastered this. I feel I will not know if I mastered this or have learned how to apply the theories into practical applications until I have some experience in a job setting.

Outcome	Yes	No	Unk	NA	Result	Feedback
Demonstrate ability to think critically.	38 97.44%	1 2.56%	0	0		
	Yes					Yes, again projects help me for thinking critically a lot more than homework out of a book.
	Yes					I found this program made me really think things over before I applied my skills. I now realize that there are many ways to figure things out and my way may not always be right or wrong, it just has to make sense.
	Yes					Cost accounting one really made you think things though and understand why this information was important.
	Yes					Yes but not as much.
	Yes					Yes, Cost and Cost 2 helped a lot. We also had the Case Analysis and Reporting class which taught this skill. However the class was not well organized being that it was new.
	Yes					I can honestly say that this skill set is one that I improved on the most while in the Accounting program.
	Yes					This program challenged me to use and enhance my own ability to think critically.
	Yes					Critical thinking is an important skill!
	Yes					Most definitely some of the classes that we have taken have help us to develop our abilities to think outside of the box.
	Yes					this is especially achieved because if accounts do not balance, one can spend several hours working on finding the error
	Yes					I feel like I am repeating myself, but...yes, I can honestly say the accounting program at WTC has helped my think differently. My attitude has changed, and I am a better person for it.
	Yes					Introduction to Ethics more than sufficiently provides scenarios where one must think critically. Douglas Weidenbach -- the instructor for said course -- is easily the most interesting, engaging, and knowledgeable educator I've ever had the pleasure of learning from.
	Yes					I think things through, and do not think that the first thing that comes to mind is the best solution. You have to take it a step at a time and look at the big picture and weigh your pros and cons.
	Yes					Western has really helped me think critically!
	Yes					Yes, because everyday we have to come up with a solution. In cost 2 accounting we definitely use critical thinking because of the project we do.
	Yes					I get how to think critically, but the time wasted on those little "exercises" in Case Analysis and Reporting was bogus.
Demonstrate ability to value self and work ethically with others in a diverse population.	38 97.44%	1 2.56%	0	0		
	Yes					Didn't understand why some classes had us work in groups when the class was online. groups are bad enough fact to face but when you don't even know the person its that much harder.
	Yes					We don't really have a diverse population in class because most of my classmates are women with a wide age range.
	Yes					People come from all walks of life, and this is very important since we live in a country with many different cultures. I can look at someone and know that they may have value things differently than me. I can stay true to myself and not expect everyone to believe in what I do. I at the same time can respect them for their beliefs.

Outcome	Yes	No	Unk	NA	Result	Feedback
					Yes	I am employed by a company that has a very diverse population. I have learned at WTC how to accept people of all backgrounds. Deep down, we all work for the same reason...to survive and be successful. WTC has taught me the skills I need to lead by example and how to have a successful career.
					Yes	Again, Introduction to Ethics (with Professor Weidenbach) more than sufficiently fulfills this intended educational outcome.
					Yes	Yes, group projects forces you to work with other people and improve your skills working with a team.
					Yes	Ethics was a major focus of several classes and assignments. I have a solid foundation now in ethical business practices. Simply being in classrooms with people of diverse backgrounds was highly educational, and I feel I am better prepared to go into any business environment.
					Yes	I found that this is the most critical area to work on. Taking other personalities into consideration is one area that needs to be worked on everyday since their are different ways of thinking of things and all have to agree on a plan to make a business work. It is just like a marriage, one has to give as well as take.
					Yes	This was easier to do here than back in high school when everyone was immature.
					Yes	I feel because I live in a small community, it is hard to tell if I have learned how to work ethically with others in a diverse population. I have good eithics so I would hope this would not be a problem.
					Yes	Ethics and moralities were enforced significantly.
Use technology effectively.	39	0	0	0		
					Yes	I was very happy with the technology I learned through the program. It showed me how much modern technology has advanced and made our jobs easier.
					Yes	I have learned so much by taking many classes online. I have also taken classes in Word, Excell, and Access. I have become computer literate, instead of illiterate. This is going to be a great asset in the work place.
					Yes	I have learned a great deal about technology that I needed to catch up on to be up to speed with the kids coming out of high school that have grown up with a mouse in their hand.
					Yes	Every course relied heavily on Blackboard and other programs, so yes -- this outcome has been fulfilled.
					Yes	There is no way I would have been able to achieve an associates degree if I were not able to take advantage of the advanced technology WTC offers. I feel very lucky for the opportunities that unfolded in my lap.
					Yes	That accounting spreadsheets was a great and useful class.
					Yes	We have definitely use technology because every week we have to be on the computer and having computer classes show us the efficient way of using them.
					Yes	I am very grateful for the technological knowledge given to me here.
					Yes	I learned a lot about Microsoft Office as well as Accounting software. Not only did we just do assignments, but we actually used the skills in real life applications.
					Yes	I loved the tech classes. They helped me become more effcient with computers and I feel more confident using excel.

Outcome	Yes	No	Unk	NA	Result	Feedback
					Yes	Yes, the programs and technology I have used and learned has improved my skills greatly.
Make decisions that incorporate the importance of sustainability	39 100.00%	0	0	0		
					Yes	This program really made me think more clearly before reacting. I actually felt like when I made a decision, I was better prepared to do the right thing.
					Yes	Yes
					Yes	Sustainability has become a larger part of my mindset thanks to my time here.
					Yes	We all need to think about sustainability for the future, to cut costs, and to use less of our natural resources.
					Yes	Knowledge is power. WTC has given me the power.
					Yes	Yes I have achieved this. I always have tried to make decisions that would help out the places that I have worked. Through my classes I have really gained an even better understanding of the necessity of this. If you do not make decisions that can be good for business, then they do not need you working for them.
					Yes	I'm not sure what this learning outcome means.
					Yes	Most courses evaded this topic or didn't address it explicitly.
Process financial transactions throughout the accounting cycle	39 100.00%	0	0	0		
					Yes	Definitely
					Yes	The only thing that I feel I still have a problem with is cost accounting. I however, feel fairly confident in processing financial transactions throughout the accounting cycle.
					Yes	Yes I have accomplished this. I found that it is more involved then I originally thought.
					Yes	Big projects like Meat R cheese were time consuming but a good way to see how everything fit together.
					Yes	The projects like Meat and Cheese, and Amman Audio were good for reinforcing the concepts and using practical applications, even though they nearly killed me at the time!
					Yes	Yes, learning step by step of the accounting cycle and than having the projects to really go through the steps helped a lot and made the process real.
					Yes	This was really well explained in the text.
					Yes	I could probably do this in my sleep, especially after going through Cost Accounting II and doing it all for real.
					Yes	An instructor told me early in the beginning of the program, "you will have an 'a-ha!!' moment". I didn't think it would ever happen, because it was as if I had suddenly swallowed a "stupid pill" when it came to accounting. Eventually, I had my moment, and it was the best feeling in the world. I am amazed at what I didn't know, and proud of what I have learned.
					Yes	The accounting cycle is made very understandable by the knowledgeable accounting instructors through repetition.
					Yes	This was done very well. We didnt just do the basics and move on to the complicated stuff, we always went back to basics to make sure we understood and never forgot.

Outcome	Yes	No	Unk	NA	Result	Feedback
					Yes	Western has helped me with this! I feel very confident with finding a job!
					Yes	This area is where I learned the greatest amount. It really prepared me for what goes into the accounting cycle. I was really amazed at how much work was done by hand compared to how a software program can now make it so much easier.
Analyze financial and business information to support planning and decision making	38	97.44%	1	2.56%	0	0
					Yes	Yes I have achieved this. The projects we have done really gets into great detail, and you realize that there are many different ways to analyze a business.
					Yes	Hardest part for me. Felt like if I had just a little more time on each chapter I would have done better.
					Yes	Yes, I think the Cost Accounting project really made this an actual thing to do and think about.
					Yes	Every class focuses on both the application of accounting and the analysis of financial ratios.
					Yes	I think the annual report project and the Cost II project really helped make me think and analyze information to help make decisions.
					Yes	Again, the practicum in Cost Accounting II was invaluable in this area, because I saw both the causes and the effects of my decisions.
					Yes	Yes. Yes. Yes. I now know why account registers, journals, ledgers, the trial balance, the income statement and the balance sheet are so important in the accounting process, and I understand what each represents. I could not say that in the beginning.
					No	I am not confident in my ability to analyze financial information. I wish this would be more addressed.
Perform payroll preparation, reporting, and analysis tasks	38	97.44%	1	2.56%	0	0
					Yes	Yes I have achieved this. The payroll project gave me the hands on to really get into great detail of the payroll process.
					Yes	I think the payroll class really helped with learning what all goes into doing payroll. I especially liked the payroll project.
					Yes	Great class with a lot of useful information, to bad things change from year to year in payroll. thought big project was a great learning tool.
					Yes	I have always performed these tasks, but now I have a much better understanding of why I am doing these processes and how important accuracy is for these tasks.
					Yes	I did learn this, however the class was kind of ridiculous seeing that the instructor made multiple mistakes and wouldn't listen to us. The overall payroll experience was a little terrible but in the end I did learn the skills.
					Yes	This was very frustrating at first, but once I got it, it made so much more sense and became one of my favorite areas. I am a numbers person and loved being able to balance the payroll.
					Yes	Murray is a stickler, but he is a good teacher.
					Yes	Payroll Accounting, Accounting Principles II & III, and the capstone project provided plenty of opportunity to perform payroll duties.
					Yes	My current part-time job is in payroll, and my education here helped me get that job.

Outcome	Yes	No	Unk	NA	Result	Feedback
					Yes	Yes, I really enjoyed the Payroll project. I thought that it was important to be able to do this manually instead of always computerized.
					No	I do not remember analysising payroll tasks.
Perform cost accounting preparation, reporting, and analysis tasks	37	94.87%	2	5.13%	0	0
					Yes	This area was the most unclear to me. I found it hard to believe there are more than one way to come up with an answer that may be different than others, but may still be right. It was way too open as to what was right and made it confusing to me.
					Yes	Cost accounting was not one of my favorite courses---in the beginning; however, I found the class to be interesting, as well as another important block in my career foundation. I perform cost accounting skills on a daily basis, and I am forever grateful for the education I received in this area of accounting.
					Yes	The cost accounting project was another exceptional project to helping us put to use all that we've learned, and not just our cost accounting but things we learned in other classes as well.
					Yes	Cost accounting was very difficult but it all pulls together during Cost 2.
					Yes	Yes I have achieved this. The cost project gave me the hands on to follow mine and my fellow students business from start to finish. It definitely put everything into perspective.
					Yes	Not as much as I would like to know. Maybe doing more in class assignment to understand and ask questions.
					Yes	Really had to take your time thinking though the problems. Like that I had check numbers so I could work part way though a problem and see if I was on the right track or not before going on.
					Yes	Yes, the project for Cost Accounting made it necessary to be able to do this.
					Yes	I LOVE cost accounting!
					Yes	Cost Accounting is probably the most difficult and time consuming class. And that is why I don't really have time for this survey.
					Yes	Of all the courses, Cost Accounting I focuses most on independent learning. While my instructor was willing to help when needed, I often found myself learning on my own or from other individuals in my class. Cost Accounting II needs some serious work -- the capstone project as the primary (if not singular) item on the grading docket is heinously overwhelming.
					No	I am still confused about the cost accounting. I am not sure on how this subject could be taught different.
					No	This did not stick very well and I think I would have a very hard time in this field due to that. I think the style of teaching in the textbook used was ineffective.
Perform organization and/or individual tax accounting preparation, reporting, and analysis tasks	39	100.00%	0		0	0
					Yes	Yes for basic individual income tax preparation. I was hoping to learn more in this area and go a little deeper.

Outcome	Yes	No	Unk	NA	Result	Feedback
					Yes	If I continue to keep up with all the tax law changes, I should be able to do this. My classes helped me to be able to understand the tax law a lot better.
					Yes	The income tax class was really a learning experience because there's so much with income tax.
					Yes	I appreciate the tax accounting preparation, reporting and analysis skills I learned in Income Tax Preparation class. Income Tax Preparations were tasks I had performed in the past, but now I know why I do what I do and when I need to do it.
					Yes	Income Tax with Jill Paetzold was one of the best classes I've ever taken. If you can't understand Income Tax after having been taught by Jill, you probably shouldn't be an accountant (or a college student).
					Yes	The income tax class taught this.
					Yes	Yes I have achieved this. I never realized before how complex out tax structure is. Filing different forms out really helped me to understand how everything fits together.
					Yes	Good class and VITA was a good follow up. You should continue it.
					Yes	I would have liked more practice sets just to practice.
					Yes	This area really proved whether or not I really learned something. It was really nice to be able to put what I learned into a project to prove that I actually learned what I came to school for.
					Yes	good class but felt really rushed at the end of the semester. hardest chapter at the end and send the less amount of time on it because we had the computer part to do also.
Identify internal controls to reduce risk	39	0	0	0		
					Yes	One of the good parts of information systems class.
					Yes	I was amazed at all the differnt controls that were necessary to become and remain successful. I learned what to look for to reduce risks and how to ensure honesty and accuracy in all accounting transactions.
					Yes	All of my classes in business accounting taught me this very well.
					Yes	This area would have been helpful to include in our Cost II project to have one person role play doing something wrong to see how the group handles not having all their risks covered.
					Yes	Yes I have achieved this. It is important to have internal controls to help reduce the risk of fraud and many other things. We had to follow internal controls in our cost project, and made sure that we stuck to our policies and procedures.
					Yes	Internal controls were stressed in many classes throughout the program.
					Yes	Accounting Principles I & III sufficiently covered the importance and implementation of internal controls.
					Yes	I have a good understanding of internal controls. The main accounting classes did a good job addressing internal controls.
					Yes	Yes, again we learn these but it was nice to have to actually create our own for our business in cost accounting. It really makes you think of all the areas that need to be covered and protected instead of just reading about it.
