

ESIM IEM Spring 2014 Student SLO Report

1. What did you like about this program?

Text Response

Hands on labs

The instructors were really nice and personable. They were there for you when needed. I liked the low amount of students in the program. It really helped to get to know each other and for studying. You also got to work with everyone which helped boost my weaker skills and vice-versa. I really enjoyed the material I learned throughout the year. It was really what i was looking for in a program.

It was challenging and new to me.

The labs and hands on experience.

the hands on experience

It was a 1 year program so i learned the skills that i need to get a job right away

2. What would you change about this program?

Text Response

Less math

I think that i would increase the time for lab activites. It really seemed like we were cramming it in there for the most part. Not necessarily the fall semester. Derfinately in the spring. Spending more time as a class studying for the MSSC certification would be helpful. Also, in occupational skills we studyied hydraulics? Why? I don't really see what that had to with Occupational skills? There were books us students bought that we never even used! I mean they are expensive and students could really use that money in other aspects of there lives. We had to buy a motor systems controls book but we actually used the electricity book from the fall semester. It was like a \$140 book that now we will only get about \$35 at the buy back time. More material and Automation and Robotics would be cool to incorporate into the program.

There should be welding and machine tool courses.

I would add a wIELDING class.

make all credits in a semester concurrent

Nothing

demonstrate basic knowledge of applied science related to mechanical drives.	0	0	1	1	4	6

20. Provide any comments you have about learning this program outcome.

Text Response

Mech drives was an ok class...Mr Burman was absent a few times which made it difficult. We would be doing labs without and lecture on them before hand

37. CONCLUSION - Please use this space to share any other feedback, comments, or suggestions about your experience at Western Technical College.

Text Response

I really enjoyed my time at Western Technical and would definately consider coming back to finish getting a two year degree in either Electromechanical Technology or Electrical Enginerring. After all the credit/class changes have been made. It would be nice to take everything I need to finsih in one year instead of two.

Overall, a very good experience.

Some of the prices in the Union Market were to high.
