

Annual Enrollment Trends

How many FTEs were generated by students declared in a program and taking program curriculum classes during at least one term in a given academic year?
 What was the unduplicated headcount for the same group of students?

For the academic years 2011-2015
 (Summer 2010 through Spring 2015)

Electronic and Computer Engineering Technology

	AY2011	AY2012	AY2013	AY2014	AY2015
Headcount	90	67	78	78	89

- The value represented in the graph is the number of FTEs generated per academic year.
- Headcount is the number of unique students in a program and enrolled in course(s) in the defined program curriculum.
- The number of FTEs includes the FTEs for only the classes that are on file with the WTCS as part of the defined program curriculum. This includes general studies and all other classes.
- Numbers for 2015 are not official until the WTCS client reporting system closes.
- The data source is report CLI330 from the WTCS portal.
- Academic Year 2011 includes the Summer of 2010, the Fall of 2010 and the Spring of 2011. 2012, 2013, 2014 and 2015 follow the same pattern of terms.
