Spring 2017 - Supervisory Management

Q3 - What did you like about this program?

It was easy to work through teachers did great working with me.

I liked that you could take the courses in any order, yet had a recommended layout if desired. Brain based learning versus standardised testing helped to improve the learning process.

It wasn't extremely difficult.

This program is awesome for the adult learner that is coming back to school after an extended leave. The core classes give you real life scenarios from both instructors and students that will help you in the future. I have recommended this program to many people, adult learners and those new to college.

I enjoyed the cohort classes the most. It felt like the course instructors were more invested in the classes and the students learning. Moving through the classes with familiar faces helped encourage and motivate me.

It was online

Q4 - What would you change about this program?

All courses should be offered online.

I just wish the courses would transfer more or be selected to be more relevant as transfer courses/credits to UWL. After graduating i see nothing transfered.

Math classes should be taught in a classroom and not online.

The only thing that I would change is to add some accelerated learning general education courses at night for students trying to get done faster.

A couple of the early classes could have been combined into one class and some of the later classes could have been stretched in to two classes. It would avoid boredom in the beginning and a sense of overwhelming in the end.
