

Student Learning Outcome Assessment

EMT Paramedic

Spring 2018

What did you like about this program?

It provided me with the knowledge to pass the tests

My fellow students made the program great. There was many ups and downs. I liked when guest speakers came into to speak about their profession and to teach us as students. I liked that you were able to work out my clinical schedule with my work schedule.

I liked the availability of resources and faculty willingness to work with students after regularly scheduled hours. Faculty put strong effort into the success of the students.

What would you change about this program?

Xxxx should not be teaching alone. He rambled on about a lot of useless and non pertinent stuff

There is a lot to change. The instructors need to be active at a Paramedic service and not work at a AEMT service like they currently do, they need to be up to date on the current Paramedic role of things. Clinicals should be competency based not hour based. There NEEDS to be more use of TA's in the class room, very under used, and they stated that they were hardly asked to come in. No letting the class out early, schedules hours are scheduled hours. Instructors need to be on time too.

Clinical scheduling in the fall. (hospital, OB, OR, ect). Maybe allow students to schedule their own clinicals with available times/locations to choose from. Having the freedom to schedule our own ambulance clinicals was fantastic. We didn't have to alter our outside schedule much to accomidate.

As a result of this program: I have learned effective communication skills.

CONCLUSION Please use this space to share any other feedback, comments, or suggestions about your experience at Western Technical College.

I am a terrible person to get this information from because I learned most of what I know through the ALS service I work for. Therefore I cannot tell what I learned from them and what I learned through school.

Please look at all of the students responses to IMPROVE your program as it needs to be IMPROVED.
