

2017 Spring Sustainability Core Ability SLO Assessment Report

Q18 - As a result of this program: I am able to make decisions that incorporate the importance of sustainability.

Answer	%	Count
Strongly Disagree	2.76%	11
Disagree	7.52%	30
Neither Agree nor Disagree	9.52%	38
Agree	38.60%	154
Strongly Agree	41.60%	166
Total	100.00%	399

Q19 - Provide any comments you have on what you learned about incorporating the importance of sustainability in decisions you make.

I do not recall making decisions that incorporate the importance of sustainability was ever a focus in any of my courses. However, I do feel like students were encouraged to make thoughtful decisions based on thorough analysis.

Forward thinking is an important skill for an accountant.

Before I began this program, I had no sense of direction for the rest of my life. Now I feel optimistic about my future in the workplace.

Before this program, I found it difficult to look ahead to the future.

I always maintain the decisions I make for every customer.

we have been taught sustainable management practices

I have a better understanding about the importance of sustainability.

Great

We recycled batteries at my internship site.

Various methods to reduce waste and conserve energy.

Learned the importance of OSHA and HIPAA

Knowing the easiest and quickest way to do something to be more proficient

I learned the importance of properly disposing of batteries and e-waste instead of just throwing them in the garbage bin.

Nothing

Food itself is an organic substance. A massive portion of litter comes from food and drink products. This industry can make a huge difference for the environment if we all work towards a better future for it!

Consistency is crucial in really anything that you do in order to have order and a rhythm to the work you are doing.

Sustainability is somewhat of a new concept to me. It wasn't discussed in great detail in our courses, but I do have a better understanding as to its meaning.

no comment needed

I already know how to think.

no comment needed

better understanding

Im still a bit hot headed

was able to before.

I would have loved to learn even more about this!

N/A

I learned the importance of having good work ethic and making decisions on what I should prioritize with my projects.

Only print when needed

I believe that sustainability should guide your decisions and we all have to protect the environment. Reduce reuse recycle.

There were a couple classes that touched on the environment. This is a technology heavy class, meaning we use a lot of it and learn different aspects of it. We were taught how this may affect our earth.

This program really prepares you for the real world.

N/A

After being in the new building for my first year of college and seeing all the things the college as a whole is doing to sustaining this beautiful Earth and local area of La Crosse, I am going to apply those same strategies to my own life.

No comment.

We did not discuss this in any of my classes.

Working in the medical field we will need a good sense on making quick and smart decisions, I believe we learned a lot from this program.

I have been able to participate in group projects make decisions and also make decisions on what we are supposed to do

We talk about the importance

It is important to make decisions that you can stand by, and if you can't support your decision you shouldn't be making it

This concept is repeated often throughout the program.

As an entry level nurse, a topic like sustainability may not be at the forefront of my thinking, but through this program I have learned a lot about sustainability and why it is important for nurses to consider.

I have learned that making decisions is a very important in the administrative field. It is important to try consider all options in making decisions.

Once again, this program has changed my way of thinking. I didn't used to think about how sustainable a document was, but now I always think ahead to anyone who might need to edit my work later.

I feel more confident with making decisions with my patients

I have learned many decision making skills

No comments.

This takes practice. So again, more practice makes it easier.

I think we've been taught to save our resources pretty well and we're better about saving and effectively using our materials.

how to keep wood in a well keepd environment
